

Investment Objective

The multi-manager portfolio is managed based on a core-satellite approach, combining both active management and index investment strategies. The core of the portfolio is invested in passive portfolios, while the satellites are invested in actively managed portfolios. This portfolio is aimed at investors with a long-term investment horizon and has an inflation objective of CPI plus 6% over any rolling 6-year period. The actual asset allocation of the portfolio may vary from strategic asset allocation due to market movement or tactical asset allocation decisions made from time to time by the portfolio manager.

Investment Approach

The portfolio aims to provide investment income and capital growth over the long term through investing primarily in local and international equity, fixed interest and cash instruments. The portfolio is optimized to have the highest probability of meeting the real return target over a 6 year investment period while minimising volatility. The portfolio is actively managed by a combination of leading investment managers and value is added through specialist manager expertise and allocation skills.

Annualised (%)

	1 Year	3 Years	5 Years	Since Inception

Fee Structure

Total Expense Ratio (TER):	Jun 22: 0.72%
Portfolio Transaction Cost:	Jun 22: 0.19%
Total Investment Charge:	Jun 22: 0.91%

Risk Profile

Risk	Low	Low-Mod	Mod	Mod-High	High
Term	1-3 years	3+ years	3-5 years	5+ years	7+ years

Moderate - High Risk

- This portfolio holds more equity exposure than a medium risk portfolio but less than a high-risk portfolio. In turn the expected volatility is higher than a medium risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a medium risk portfolio, but less than a high-risk portfolio and the expected potential long term investment returns could therefore be higher than a medium risk portfolio.
- Where the asset allocation contained in this MDD reflects offshore exposure, the portfolio is exposed to currency risks.
- The portfolio is exposed to equity as well as default and interest rate risks.
- Therefore, it is suitable for medium to long term investment horizons.

Information & Disclosures

Fees: Fees are quoted per annum and excluding VAT. The investment manager fees are based on strategic weightings and may vary from time to time. The portfolio may include investment managers with performance fee structures. This may result in higher overall fees, but only when performance targets agreed have been exceeded. Details of performance fees paid to underlying managers over the previous calendar year will be provided to clients on request.
