

Investment Objective

The objective is to achieve a high level of sustainable income and stability of capital invested.

Investment Approach

This will be achieved by making use of low duration income instruments to deliver a diversified income solution that has low volatility and high overall liquidity. To provide relative capital stability, the weighted average modified duration of the underlying assets is limited to a maximum of two years. Investments to be acquired for the portfolio may include assets in liquid form, bonds, fixed deposits and other interest earning securities which have a fixed maturity date and either have a predetermined cash flow profile or are linked to benchmark yields. The portfolio may also invest in participatory interests and other forms of participation in portfolios of collective investment schemes. The portfolio may from time to time invest in listed and unlisted financial instruments.
